

Information and Options for Beef Cutting Instructions

This is the information we need to know for cutting instructions on a beef. If there is a cut you do not want or would not use, we can offer different suggestions for the cut. The most important information we need to know for the cutting is: How **thick** you want your steaks, how **many** pieces you want in a package, and what **size** you want your roast. Normal thickness of steaks is 3/4" or you may request any thickness you would like.

Please complete each section.
